

Electrification of Transportation

Black & Veatch As Your Strategic Partner

BLACK & VEATCH

Our Value Proposition

Black & Veatch provides our transportation electrification ecosystem clients with global experience and local resources to study, design and deploy innovative and right-sized solutions for your make ready electrical and charging infrastructure, operations & maintenance and sustainability needs.

Delivering On Your Goals

As your strategic partner and integrator, we'll help you navigate through every stage of your project from planning and business case development to design, engineering and deployment. Black & Veatch can provide complete, turnkey program management, or simply assist in one or more project phases.

Our Service Offerings

Black & Veatch expertise includes all aspects of how electrons are pushed and pulled from the grid, and we work with you to provide economical, sustainable solutions. Specifically, for charging infrastructure we can help you with:

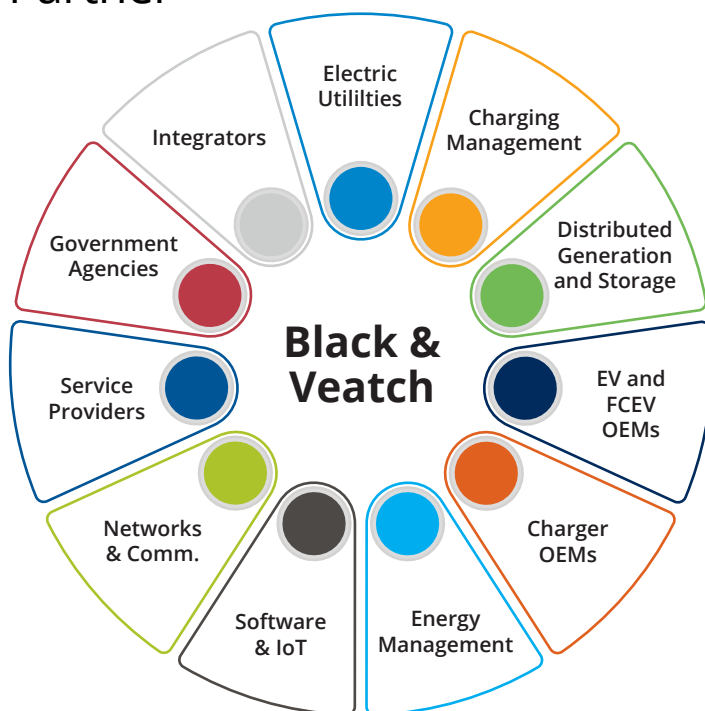

- Charging Infrastructure Planning and Siting
- Distributed Energy Resource Planning
- Utility Coordination and Interconnections
- Microgrids and Resiliency as a Service
- Make-Ready Infrastructure Deployments
- Operations, Monitoring and Maintenance

Industry Collaboration

Black & Veatch is an active member of leading transportation industry organizations that bring industry stakeholders together to share knowledge and to accelerate zero-emission transportation.

Black & Veatch As Your Strategic Partner

Proven Experience & Expertise

A leader in the clean transportation market, Black & Veatch has completed design, engineering, permitting, and construction for over 1,500 electric vehicle charging sites, totaling thousands of chargers, and the first U.S. open-to-the-public high-powered charging station for heavy-duty vehicles. Black & Veatch brings the knowledge, experience, and end-to-end solutions to plan and deploy cost-efficient, sustainable, and resilient energy and transportation systems.
