

Latin America Power Solutions

Reliability • Resiliency • Financial Certainty

BLACK & VEATCH

As an integrated global power generation, transmission and distribution infrastructure leader, we're your trusted partner for innovative, end-to-end services for new and operating asset, as well as full engineering, procurement and construction (EPC) solutions. We offer conventional, renewable, and distributed power generation, transmission and distribution, microgrids, and behind-the-meter services. Our execution is centered on safety and characterized by cost and schedule certainty. Our flexible, cohesive teams provide seamless project delivery solutions across the entire project life cycle.

Industry Leadership

Operational Execution

- 100+ countries on six continents
- Global workforce of over 10,000 professionals
- Multiple global execution centers staffed with multi-disciplinary teams and specialized expertise
- Over 2 GW of solar EPC projects and over 56 GW of total wind experience

Safety & Quality

- Industry leader in safety performance
- Recognized for safety and health excellence by government agencies and clients across the globe

Key Region Capabilities

- Owner's Engineer
- Program Management
- Project Management
- Project Implementation
 - Detailed Design & Engineering
 - Procurement
 - Construction Management
 - Project Planning & Schedule
 - Project Cost Control
 - Commissioning/Startup
 - Plant Performance Testing
 - Operator Training
- Performance Engineering
 - Integrated Performance Maintenance and Reliability Engineering
 - Monitoring & Diagnostics – ASSET360®
 - Performance Monitoring & Plant Optimization
- Retrofit and Plant Modernization
- Decarbonization
- Distributed Energy
- Renewable Energy Development (Solar, Wind, Battery Storage, Biomass)
- Transmission
- Technology Evaluation
- Feasibility Study
- Conceptual Design
- Combined Heat and Power
- Repowering
- Risk Mitigation and Planning
- Nuclear

Why Choose Black & Veatch?

Global Reputation

- Experience with many global clients gives our clients assurance of successful projects that enhance long-term business & operations objectives.
- Track record of involvement with “state-of-the-art” facilities showcasing our ability to deliver reliable and innovative solutions.
- A workforce that combines global experience and local resources.
- Trusted name recognition with financiers, construction contractors and original equipment manufacturers.

Region Specific

- Financing solutions to key projects.
- Application of vast global project experience to local projects.
- Deep technology experience, supporting the selection of equipment, engineering, and design to meet client financing goals and asset performance criteria.
- Environmental and sustainability services.

Renowned Owner’s Engineer Experience

- Minimizing work change orders.
- Maximizing schedule and safety.
- We help clients plan, build, and operate new plants and evaluate options to refurbish, repower, retrofit, or retire existing facilities.

Deep Expertise in Plant Performance Optimization

- Output capacity
- Operational availability
- Improved heat rate efficiency

Innovative Engineering

- Can deliver any power generation technology — solar PV, wind, battery storage, hydro, natural gas or diesel-fueled engines, combustion turbines, combined heat and power, and microgrids.
- Have long-term experience solving complex problems.
- Can apply lean staff structure to achieve lower cost without compromising quality.

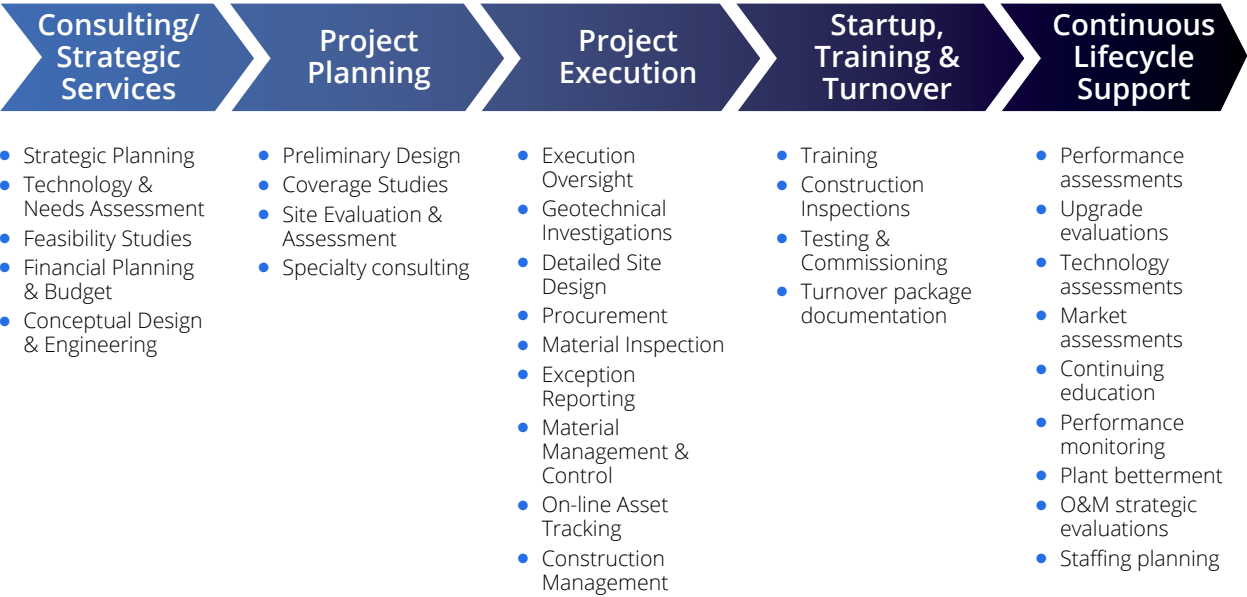

Construction Management

- Leveraging internal engineering with construction oversight enables integrated cost-effective solutions, reducing total execution cost.
- Deep knowledge of site construction requirements allows for optimal design, reducing construction schedule and total installed cost.

Global Procurement Operations

- Procure equipment and materials through our worldwide channel of resources and global execution centers located in Beijing, China; Bangkok, Thailand; Jakarta, Indonesia; Mumbai, India; and Pune, India.

Scalable, Full-Scope Solutions To Fit Client Requirements

Building a World of Difference®

Black & Veatch is an employee-owned engineering, procurement, consulting and construction company with a 100-year legacy of innovation in sustainable infrastructure. Black & Veatch has supported social responsibility through critical human infrastructure projects around the world. Our professionals have executed complex projects from planning and EPC, to operations and maintenance. In emerging regions, we apply our expertise in energy, water and telecommunications to fulfil our Mission of *Building a World of Difference*.® We deliver sustainable global solutions through a localized, balanced approach to infrastructure and capacity development.

We seek to deliver economic growth through projects we deliver. Enriching the communities also means helping build prosperity in those communities, both through personal and economic growth. Black & Veatch seeks to improve the skills of individuals, create jobs and grow the economies of the communities we work in across the world.
